

Parcel Services and Express Freight – Contract Prices January 15, 2024

The pricing of parcels is based on units and the mailed item's measured weight or volume, whichever is the greater. The cubic measure used for parcels is $1m^3 = 250kg$. The minimum pricing weight is 1000g. The maximum batch size for multi parcel shipments (MPS) is 10 items.

The pricing of Express Freight is based on the transport unit type, the size of the shipment lot, transport distance, and the additional service used.

Unless otherwise stated, the prices include transport from a Posti outlet to the recipient or pick-up location. A pick-up can be ordered for items (subject to a separate charge), or a pick-up and delivery contract can be signed with Posti.

An applicable fuel surcharge will be charged separately. The currently valid fuel surcharges are specified on Posti's website on page posti.fi/fuelsurcharge.

Value added tax

The tariffs and rates are quoted excluding VAT, unless otherwise stated. VAT valid at the time will be added to prices during invoicing. No VAT is added to the tariffs and rates applying to mail addressed to the Åland Islands, special areas outside the European Union's excise and VAT zone and non-EU member states.

How to measure longest side + circumference

- **Step 1:** identify and measure the longest side of your parcel (S1)
- **Step 2:** measure the circumference (S2+S3+S4+S5).

Longest side (S1) + circumference (S2+S3+S4+S5) = your total

If the total is max 300 cm with a max weight of 25 kg* the shipment can be sent as a parcel.

If either dimensions or weight exceeds allowed max, the shipment will need to be sent as freight

*Express parcel's weight can be max 35 kg with oversized additional service.
