How is the price calculated?

Shipment:

The price of the shipment is determined on the basis of the service type and the size of the parcel. Small Parcels and Postal Parcels, Home Parcels, Express Parcels and returns with a maximum size of 40 x 32 x 26 cm have fixed prices.

The prices of other services are determined on the basis of the parcel's actual weight or volume weight (see the example on page 12).

Additional services:

The price changes if you order additional services (e.g. Cash on Delivery).

Value added tax (VAT):

VAT valid at the time will be added to prices during invoicing.

No VAT is added to the tariffs and rates applying to mail addressed to the Åland Islands, special areas outside the European Union's excise and VAT zone and non-EU member states.

Invoicing:

We invoice shipments monthly.

The price of the paper invoice is € 5.24 + VAT/invoice.

The invoicing information for existing invoicing customers will remain unchanged.

Level 2 pricing:

Price level 2 comes into force when the number of items exceeds 500 in a calendar year. The number includes domestic parcel products. The number of shipments is checked monthly.

Existing and new customers start at level 1.

Example: In July, the total volume exceeds 500 parcels. The volume check will be carried out in August.

How to measure longest side + circumference

- **Step 1:** identify and measure the longest side of your parcel (S1)
- **Step 2:** measure the circumference (S2+S3+S4+S5).

Longest side (S1) + circumference (S2+S3+S4+S5) = your total.

If the total is max 300 cm with a max weight of 25 kg*
the shipment can be sent as a parcel.

If either dimensions or weight exceeds allowed max, the shipment will need to be sent as freight.

*Express Parcel's weight can be max 35 kg with Oversized additional service.
